

Case Study #47: Townhouse Roof Maintenance

July 20, 2008

Mr. David Wilson,

I want to thank you very much for discovering the Energy Seal products that you painted onto my roof this spring! For the first time since I have owned this house, I have been able to maintain a steady and comfortable temperature on the top (third) floor of my home, even on the hottest summer days! Prior to this summer, the temperature on the top floor has been as much as 8-10 degrees warmer than the lower floors, necessitating the use of fans to remain comfortable. With Energy Seal on the roof, that is no longer necessary!

Thanks, again!

Carter Enyeart
