

Commercial Rebates

CEILING/ROOF INSULATION & SPRAY-ON REFLECTIVE ROOF COATING

QUALIFICATIONS/GUIDELINES

1. Qualifying businesses must operate a minimum of four (4) consecutive hours daily between 2 p.m. and 8 p.m. weekdays, May 1 through October 31.
2. A pre-inspection must be performed by Austin Energy **before the new equipment is installed** to determine the existing R-value of the roof and/or ceiling system or verify the existing roof is not reflective.
3. The rebate application must be submitted **before** the new equipment is installed. The rebate application must be accompanied by the **manufacturer's rating information** verifying the proposed R-values, rated reflectivity and warranty information.
4. All installed roofing materials require a minimum one-year installation and three-year product warranty.
5. Qualified small business and non-profit customers may be eligible for an additional 20% bonus on rebates.
6. An Austin Energy Representative will schedule an inspection to verify the installation and determine the final rebate amount.
7. The customer will receive their rebate check 4 to 6 weeks from the date of the final inspection.

SPECIFIC QUALIFICATIONS

1. The area where insulation or spray-on roof coating will be added must be over a mechanically cooled space.
2. **This category is only available for spray-on application for existing construction.**

Ceiling Insulation

- The existing ceiling and roof system must have an overall R-value of R-15 or less to qualify.
- The insulation added to the ceiling system must be R-8 or greater.
- Blown-in or loose fill insulation placed above lay-in ceiling does not qualify.
- Air-conditioning supply and return paths located above the ceiling must be ducted and insulated.
- Furr-down and knee wall cavities must be insulated.

Roof Insulation

- The existing ceiling and roof system above the conditioned space must have an R-value of R-15 or less to qualify.
- The insulation must be installed between the roof surface and the conditioned space.
- The insulation added to the roof system must be R-8 or greater.

Reflective Roof Coating

- The existing roof must not be a reflective roof.
- The reflectiveness of the spray-on coating must be measured by test methods ASTM E424-71, E903-96, C1549-04, E1918-97 or a solar spectrum reflectometer and have a minimum reflectivity of 75%.
- ASTM test result data verifying the 75% reflectivity must accompany the rebate application.

The Austin Energy guidelines and rebate levels are subject to change at any time, without notice.

Rebate Calculation: \$0.30 x Ceiling or Roof SF = \$ Rebate \$0.30 x _____ = \$ _____		<i>This category does not apply to new construction related applications.</i>

Will rebate on ceiling or roof but not combination

ADDITIONAL CUSTOMER AGREEMENT CLAUSE

As a qualified Austin Energy customer, I understand that the rebate I am applying for will under no circumstances exceed 50% of the installed cost of the work. I also agree to retain all qualifying equipment at the location in which it was originally installed, identified as the "installation address" on this application. The Customer is responsible for maintaining the operational efficiency of all qualifying measures for a period of no less than five (5) years from the date of this agreement. The Customer agrees to allow an Austin Energy Representative to inspect the referenced facility for compliance with this requirement for the duration of this agreement. In consideration of this rebate, customer assigns all rights to any and all environmental attributes and or credits, including any renewable energy credits, carbon offset credits, or similar environmental credits derived from the energy conservation associated with this rebate to Austin Energy for Austin Energy's use as it may choose.
